

# Are you moving?

When you are moving into a new or new-to-you house, there is plenty to remember. Here are a few helpful hints from Kitchener Utilities to keep in mind:

- Visit [www.kitchenerutilities.ca](http://www.kitchenerutilities.ca) to complete your account closure and open new account requests online or call 519-741-2450.
- Consider renting your natural gas water heater from Kitchener Utilities. We offer the lowest rates in Kitchener, and you can always count on our local, reliable service.
- Have your natural gas furnace and central air systems checked by Kitchener Utilities when you move in. Then, celebrate your move-in anniversary by having them serviced each year. Routine maintenance is often more cost-effective than having to pay for unexpected emergency repairs.
- Change or clean your furnace filter every one to three months to ensure optimum efficiency and air quality. Install a higher efficiency furnace for more savings.
- Always put safety first and have a certified natural gas technician make any changes to your natural gas appliances or gas lines.
