

PUBLIC NOTICE

KITCHENER UTILITIES

RESIDENTIAL NATURAL GAS RATES

for May 1, 2009

Kitchener city council has approved changes to Kitchener Utilities' natural gas rates effective May 1, 2009.

The approved rate change is:

- A transportation rate decrease to 4.491 cents per cubic metre

The impact of the transportation rate decrease is expected to produce an overall rate decrease of two per cent – or approximately \$17 per year – for the average residential customer.*

*Calculated based on annual consumption of 2,100 cubic meters of natural gas.

The transportation rate is the charge for bringing natural gas to the Ontario border.

The decreased transportation rate reflects the final rates for 2009 charged by TransCanada Pipelines as approved by the National Energy Board.

Kitchener Utilities is committed to providing the best value possible for our customers.

Information is available upon request from
