

Investing now to serve you better today and tomorrow

To maintain and enhance our community's reliable water and sewer services, the City of Kitchener is increasing your water rate. Effective April 1, 2011, the water rate is \$1.5714/m³. The sewer rate remains unchanged at \$1.7295/m³. For 2011, the average Kitchener household will see a water rate increase of approximately 92 cents per month. This increase is an investment in our community and the reliability of the water and sewer systems that serve the needs of today's customers, and customers for generations to come.
